Students' Questionnaire

Dear student,

You were selected as a possible participant in this study. Your participation is really important because your answers will help lead to a better understanding of faculty's attitudes toward the use of Information and Communication Technology (ICT) in Higher Education, including both those who currently do use and those who do not; also, your answers to the questionnaire will present information that will be useful to a project titled "Modernization of Teaching Methodologies in Higher Education: EU Experience for Jordan and Palestinian Territory (METHODS)" funded by Erasmus+ Programme. The survey will take approximately 15 minutes to complete. If you decide to participate in this study, please scroll down to start the survey. If you do not wish to participate, simply discard the questionnaire. Completing and submitting the questionnaire constitutes your consent to participate.

Participation in this study is entirely voluntary; your willingness or unwillingness to participate will not affect your relationship with your university. However, there are no foreseeable risks in your participation in the study. If you decide to participate, you are free to withdraw and discontinue participation at any time without penalty and without loss of benefits to which you are otherwise entitled. If you withdraw from the study before data collection is completed, your data will be destroyed and dropped from the study.
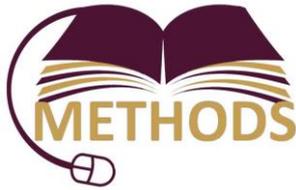

Responses will be completely anonymous; your name will not appear anywhere on the survey. All of the information you provide will be kept confidential; only summaries of responses will be reported. Your survey response cannot be linked to you or information about you in any way. Once again, we would like to assure you that all information you provide will remain confidential. Please take a moment to answer the questions. This is an opportunity to help us to get an essential information to ensure a successful implementation of the project; also we hope that you will answer the survey questions thoughtfully and thoroughly.

Thank you in advance for your participation, assistance, and valuable input.

Sincerely, METHODS Team
Erasmus+ Programme
